HOW TO READ

If you have read a Globen Lighting catalogue before, you may notice that this year's edition has a new design and structure. We hope you will enjoy it as much as we do.

The biggest change is how you read the information about each product. To make it easier for you, below you will see a quick reference guide on how to read the product information.

7290-11 (black)

FRANS

Textile/Metal | W 32 D 32 H 37 | 4 pcs
1xE27 | Max 60W | Rec. E110

7290-11 (black)	Article number and colour
FRANS	Product name
Textile/Metal	Material
W 32 D 32 H 37	Width 32 Depth 32 Height 37 (cm)
4 pcs	Number of pieces in master box
1xE27	Number of light sources and lamp socket
Max 60W	Maximum Watt
Rec. E110	Our recommended light source

LIGHT SOURCES

At the end of the catalogue you will find most of our range of light sources. We recommend the light source that we think is most suitable for the lamp, but actually sometimes there are several different light sources that fit the lamp and sometimes it also depends on your personal taste. The light source we recommend always works, but you can of course choose another one.

We hope this guide will help you when reading this catalogue. If you need further information about our products, you can have a look at the last pages with index or visit www.globenlighting.com

WELCOME 2018-2019

Temperature is dropping, nature is changing colours and days are getting shorter. Autumn's here and we once again go inside to decorate our homes, cheer and cook lovely dinners. Now we also light candles and turn on the lights, it's lighting season!

With Autumn's entry we also welcome the latest in interior lighting - Globen Lighting's brand new catalogue. We recently released our Autumn-Winter 2018 collection and wow, what a positive response we got. We're so thrilled that so many appreciate what we do. That makes us want to do even more and better.

So, what does the new collection offer? The red thread in our Autumn's collection is pretty much a soft and cozy feeling - velvet, textile fringes, soft round shapes and warm metallic tones where brass is still the strongest trend. Some new beautiful handmade ceramic table lamps, making cozy shadows in the room. Besides that some african touch with our lovely friends, table lamp Zebra and the monkey Marcel, some new graphic black and white series for the modern interior. And of course some new lamps in our best selling series from this Springs collection Drops and Ray.

We also released our first lamp with IP44 class that can be used in e.g bathrooms, please see the combined wall- and plafonier lamp Art Deco in two colour settings.

We're also glad to announce some new designers, for instance the creative design studio WIS Design, who previously have designed products for e.g IKEA and Klong. Their Fringe lamp in laser cut metal with "fringes" is a modern version of the fringe lamps.

Our hope is to inspire you and transform your mood. That's what we do.

Welcome into Globen Lighting's enlightened world.

Erika Norén
Marketing & Sales Manager

APPEALING PACKAGING

The last year we have released a new package design. We wanted a package design that feels contemporary and that matches its content. The new packages consist of high qualitative cardboard with thick and nice paper to contribute to a true qualitative feeling and an appealing look. The packages of our smaller articles will come with handles in black rope, this is in order to offer a decorative giftbox-feeling for the consumer that will carry our lighting products home and to save us from using paper- or plastic bags. On the front of the package there is a black front label with an illustrated picture of the article and on the backside of the carton you will find the most important information about the product.

Marketing Coordinator

OUR DIGITAL PLATFORMS

INSTAGRAM

We spend as much time, if not even more, to socialize with our friends and family online as in real life. There is no doubt that this digital revolution during the last decade has changed our lives in other aspects as well. One of the aspects is that it is more accessible to search for and be exposed to life style inspiration such as interior and lighting. Many people want to know how others decorate their home in order to collect inspiration for their own homes, the sky is the limit when it comes to social media such as Instagram.

If you want to get inspired and get an impression of our products, check out our Instagram account. There you will get lighting inspiration, lamp advices and glimpses behind the scenes. We post pictures of our products in beautiful stylings where they bright up the atmosphere.

If you share a photo of a product of ours and tag us @globenlighting or use #globenlighting maybe your photo will be reposted in our inspirational feed.

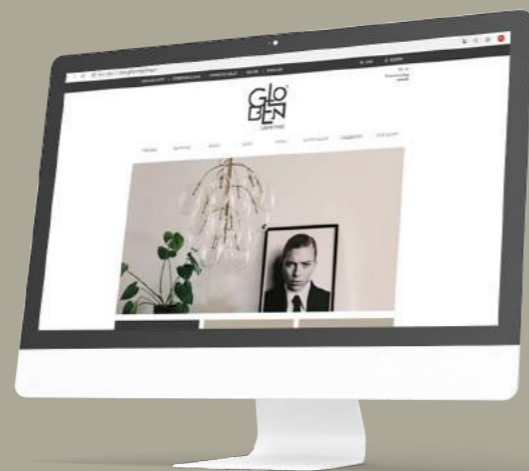

WEBSITE

Visit www.globenlighting.com to enter a world of well designed lighting products. On our website you are able to view our full product range, read product information, get inspired by interior photos and also place your order if you are a customer of ours.

The website is real-time updated and is connected to our ERP-system in order to show the current stock status and also informs what date an article will get back in stock again. If you are looking for a specific article that is out of stock, then you may use our "Remind me"-function to receive a mail when the article comes back in stock.

If you are not a customer of ours you may apply to become one by sending in an application directly on the website. Consumers that are interested in purchasing our products can find their nearest retailer to collect one of our lighting pieces.

THE PUBLIC MARKET

Globen Lighting design, manufacture and sell interior lighting for consumers as well as contract projects. We offer both our existing product range, and also customized lighting based on your project's needs.

Our range is almost 100% designed InHouse at our Head office in Svenljunga, southern Sweden. In addition, we cooperate with some selected external designers. Our design is based on a modern, exciting and creative design feeling. The production takes place in our own factory, which makes us both very flexible and competitive, even at lower quantities.

Existing product range

If you are interested in using our existing product range to a smaller project, you can directly place an order and get the delivery within one week. For larger projects (>50 pieces), we will make you an offer with delivery time. Often we have it in stock, but sometimes we need to send it from our factory with a delivery time about three months.

Customizations in existing product range

Do you like some of our existing products, but want to adjust it to your project, it is possible to do changes in e.g cable length, colour, size, details etc.

Fully customized products

Do you need totally customized products from your own sketches and needs, we also do offer this service. We have done a lot of large spectacular lamps for different kinds of projects.

Examples of environments we deliver to are hotels, restaurants, offices, lighting for entire store concepts, hospitals, libraries and many more. One of our reference objects you can see here beside, custom made lighting for lobby, restaurant and hotel rooms for The Box Hotel, Linköping, Sweden.

6298-55 (Spring)

6410-55 (Hole)

6416-55 (Bowl Mini)

Glass is a flexible material that has been seen in our homes in many hundred years. The flexibility of this material enable us to form it in different shapes and also colour it in different colours.

In our product range you will find plenty of delightful glass lamps, often in combination with metals such as brass or chrome. A great current trend is the smoke coloured glass that fits perfectly with shiny brass, please note Drops High table lamp and Art Deco pendant that are both new lamps from the Autumn-Winter Collection 2018 with smoke coloured glass.

In this new collection we have finally launched our first IP44 classed lamp in the Art Deco series. It is a wall lamp that can also be hung as a plafoneer. Imagine this above or next to your bathroom mirror or perhaps in the ceiling. Choose between the black and white version for the modern monochrome bathroom or the version with brushed brass and a sophisticated smoked glass.

Nothing looks so luxurious in an interior like some glossy brass or chrome, right? Combine it with some soft velvet cushions on the couch, modern posters and prints on the wall and some fresh cut flowers in a vase of glass on the table. There you have the latest interior trend seen all over social media and interior magazines.

Some elegant metal lamps you will find on the following pages, we are sure you will find your own favourite.

GRAPHIC METAL

2556-11 (Comet)

2850-11 (Luna D)

Graphic interior design is a trendy element in the Scandinavian lifestyle. Black and white colours, sharp edges and straight lines are all important characteristics for getting a Scandinavian graphic design.

You can choose from lighting shaped as cubes, squares and stripes to minimalist designs and combine your graphic lighting with simple posters to get the style.

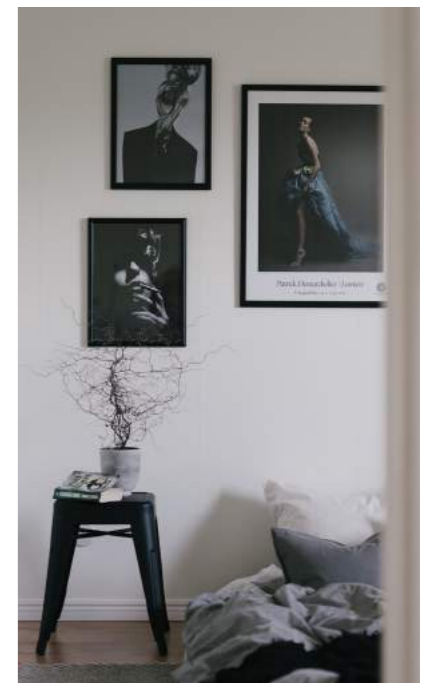

It may sound quite cold and hard, but the fact is that the style gives both life and a new expression to your home. In our product range you will find plenty of armatures that is trendy right now. Our popular series Ray is available in chrome, brushed brass and of course black metal - lamps that make your home really trendy.

ALEXANDER MEYENBERG HALL

Designer

Alexander Patrick Meyenberg Hall (Patrick Hall) has designed a big part of Globen Lighting's product range. In fact he has a Master of Business Administration but has a genuine interest for colour and design where furniture and lighting are placed in center and has therefore chosen to work in the lighting industry.

The core idea with Alexander's design is innovative thinking with focus on graceful simplicity. Alexander's design has been represented in the Nordiska Museet in Stockholm with our popular lamp Diamond, one of the most announced and successful lamp series during the recent years. Alexander has this Autumn designed e.g Frans, Ray, Drops and Art Deco.

ANNA LANDERHOLM
Designer

Anna is born in Kungsör but is nowadays living in Arboga. She is educated in graphic design, pattern design and screen printing at "Formakademin" in Lidköping. Anna is also educated at Eskilstuna Folkhögskola and has previously made designs for sofa covers and porcelain just to mention a couple of things from her career.

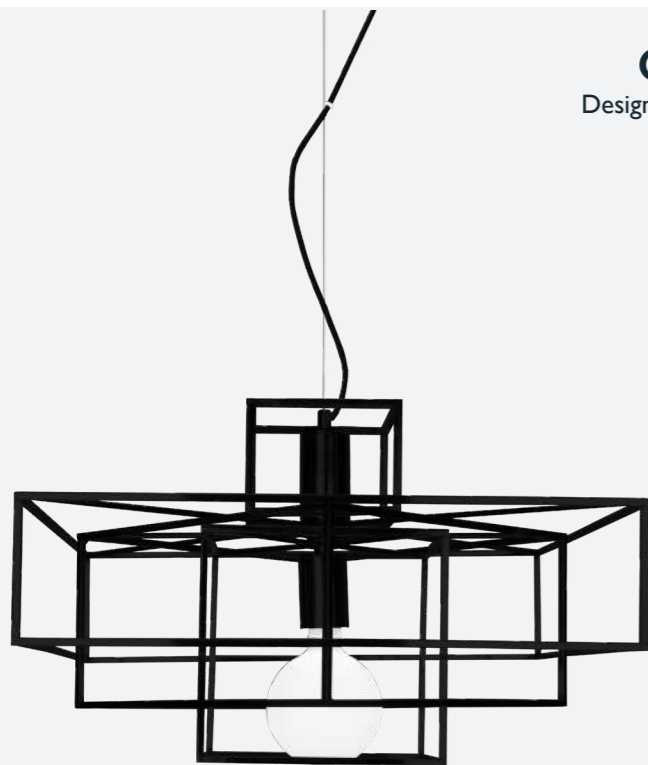

Design is a big passion for Anna and she enjoys to find inspiration from older days, often through architecture, ornamentation and scenography in old movies. Anna has designed the lamp Astoria for Globen Lighting. The lamp is inspired by the 20th century New York. The straight lines from Art Deco, symmetry and geometric shapes are attributes you can find in her Astoria serie at Globen Lighting. In fact, Astoria won a design competition in 2016 held by swedish interior magazine Hus & Hem in collaboration with Globen Lighting and Inred.se.

WIS DESIGN

Designer

WIS Design is a swedish design duo consisting of Lisa Widén and Anna Wallin Irinarchos. Their design is often characterized by a poetic and playful expression, where function and decoration work together to make that "little extra" to all the objects that surround us in our everyday lives.

WIS Design designs everything from small everyday objects to larger furniture, such as their works "Decades" - a chest of drawers from different decades - which can be viewed at the National Museum. WIS Design started their collaboration with Globen Lighting in the fall of 2018 and has designed the Fringe series with metal fringes. Fringes have been seen in fashion and decor for decades and these lamps have attitude, feel luxurious, feminine and bohemian chic. Through Fringe, WIS Design has created its tribute to the fringes.

The series Fringe is the beginning of a new collaboration between WIS Design and Globen Lighting in the fall of 2018. This pendant consists of a shade with laser cut metal with different widths, and details in brushed brass.

NEW

ILLUMINATI

Enlightenment, science and innovation, the innovative LED pendant "Illuminati" is similar to the association of the 16th century for this. The pendant has 60 integrated frosted LED diodes bedded in a way that lights up a dark room like a star-spangled sky. The LED diodes are interchangeable and have a lifetime of 20 000 hours each.

MALIN LUNDMARK
Designer

Malin Lundmark is a product designer, born and raised in the northern part of Sweden. She has a Master of Fine Arts from the National College of Art, Craft & Design (Konstfack) in Stockholm and has also studied at Design Academy Eindhoven in The Netherlands.

Malin designs functional products with a poetic and playful approach where the every day life often is a big source of inspiration. In her creations she mixes fantasy and playfulness with technical solutions that together create unexpected experiences in her products. For Globen Lighting Malin has designed the series Box, Butler and Scandi among others.

Fringes are seen in both clothing and furniture right now. Frans is a series that beam exclusivity. Imagine Frans table lamp on a table next to the couch or perhaps on the nightstand by the bed.

ERIKA NORÉN
Designer

Erika Norén is educated in marketing and economics and is a graphic designer with a great interest in interior design. With previous experience in the textile- and interior industry she has an eye for colour and shape, and with her creative skills she creates with both her hands and with digital tools.

Erika's design is based on simplicity with focus on trends and influences from the shapes and colours of nature and different parts of the world. For Globen Lighting, Erika has designed the combined wall lamp and plafoneer "Soleil" and the soft wall lamp "Walther".

CERAMICS

3207-08 (Zebra)

7817-10 (Leonore)

3117-10 (Core)

In the modern society of today it can be pleasant to go back in time and remind ourselves of materials that derive from history. Ceramics has been seen within the whole interior industry a lot during the year of 2018 and we do believe that this trend will continue. This rough material is down to earth and also a perfect contrast to soft textiles such as velvet that no one has missed is one of the greater interior trends right now.

In our product range we have welcomed earthy colours such as taupe (grey), white and matt black. Playfulness is also something that is trendy within the ceramics world, please note our kitschy lamp Zebra that is a frisky interior detail to place in your home.

Other new lamp series of this year are Moonlight and Peak. These lamps are in all simplicity made of white ceramics, but really do become nice pieces because of the patterns that are stamped in the armatures. The patterns create a magical light spread and shadows that for sure will transform your mood a dark and cozy evening.

LET'S PLAY

1312-04 (Balloon)

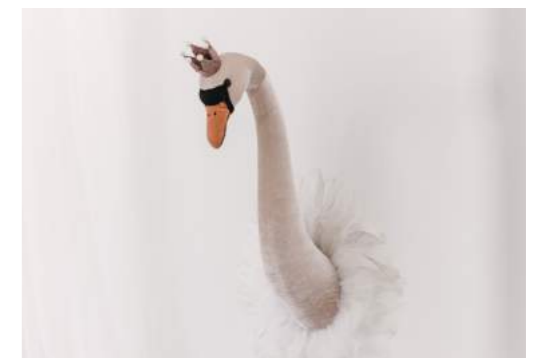

1312-10 (Balloon)

7373-52 (Walther)

1313-04 (Unicorn)

In the last years the kids room have gone through a transformation. Today's kids room are stylish decorated, instagram friendly and not only for kids play. We have now opened the door to the kids room and would like to show it as much as the rest of the home.

We see minimalistly decorated rooms focusing on trendy details and dull pastel colours. No parent can have avoided the recent years "must haves" in the kids room. What about the sheer canopy in dull linen fabric over the perfectly tidy bed, the indian tipi tent, all the wooden toys and sweet posters and paintings. Unicorns, pandas, mammoths, svahns... the list goes on. There's so much sweet details in todays kids room.

Of course, these beautiful kids room need matching lighting. Globen Lighting has a series of lamps designed specifically for the kids room. In addition, there are a number of other lamps that also work well, although at first glance they are not seen as a obvious lamp for the kids room.

Have a look on the next pages of our lamps for the kids room. Other possible lamps that could fit is sweet little wall lamp Walther with velvet shade, Diana with its white tulle, Frans with textile fringes, Shelfie or playful Piff and Puff. Only the imagination sets limits.

FOR THE KIDSROOM

1138-20 (Ash)

1755-20 (Wagner XL)

1028-11 (Anastasia)

The Scandinavian interior style often consists of dimmed colours such as white and grey in combination with bright materials such as ash wood or rattan.

Our typical Scandinavian wood lamps are designed with elegance and simplicity, it is no doubt that our Nordic roots have influenced us when designing our Scandinavian product range. The wood lamps are often combined with shades either in linen or cotton, just to get that genuine feeling of nature.

If you want to use Scandinavian design lamps in your home, a good advice is to mix it with dark and black elements to make an interesting contrast with attitude.

THANKS TO

It would not have been possible for us to create this catalogue if it were not for those who have helped us with interior photos. The following people we would like to give our biggest thanks to.

Move2 Homestaging (<i>cover photo etc.</i>)	@move2
Elina Arkéus (<i>cover photo etc.</i>)	@elinaarkeus
Filippa Krantze	@homestaginglceab
Desiré Östergren	@dessimfoto
Caroline Hilleberg	@hillehem
Otilia Gustafsson	@styledbyotilia
Cahtrine Doreen	@cathrinedoreen
The Box Hotel Lidköping	@qualityhotelthebox
Emma Carlsson	@emmashem_
Johanna Johansson	@mylifebyj
